

Bee City USA - San Diego

I am a Leafcutter Bee (Genus *Megachile*). I carry pollen under my belly instead of on my legs. Oftentimes, my underbelly is bright yellow with pollen. I like to nest in holes (cavities) in wood and I line my nest with pieces of leaves or petals I carefully cut with my jaw (mandibles). I do not share my nest with other bees. I am a solitary bee.

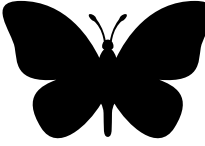

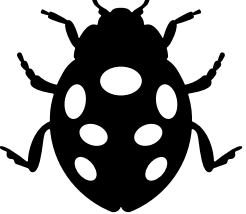

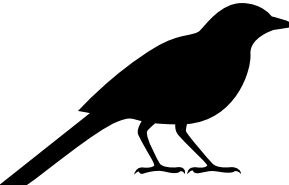

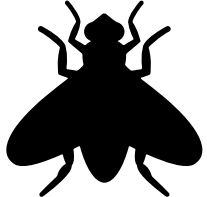

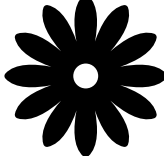

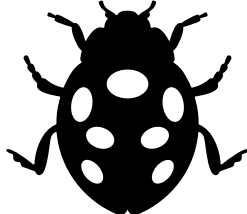

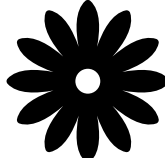

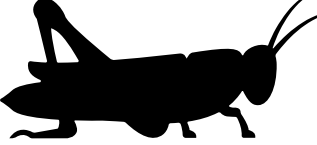

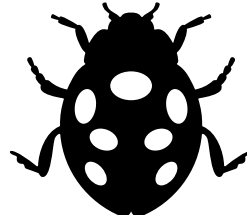

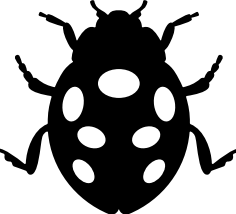

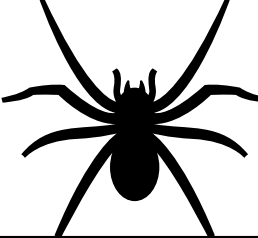

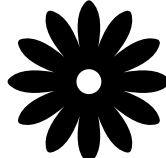

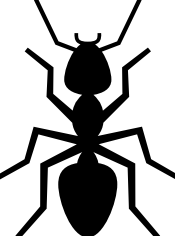

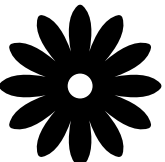

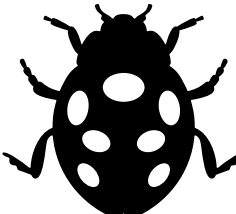

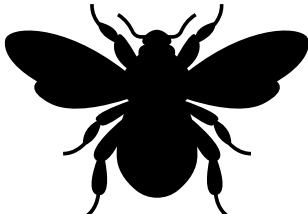

I am a Texas Sweat Bee (*Agapostemon texanus*). My striped body is shiny metallic green and I have light green eyes. I like to collect pollen and sip nectar from many different flowers. Like most of San Diego's bees, I build a nest underground and do not share my nest with other sweat bees. I am a solitary bee.

I'm a Sonoran Bumble Bee (*Bombus sonorus*). I'm big and have lots of yellow and black fuzzy hair. I collect pollen in pollen baskets located on my back legs. Most of the time, the pollen is yellow, but sometimes it's purple or blue, depending on which flower I visit. I share my nest with other bumble bee workers and a queen. My nest is underground or in leaf/wood litter.

Neighborhood BINGO (Bee-n'Go)

Find these things in your neighborhood or at the park. Check one at a time. Complete a row or column.

A butterfly ☐ 	A bug on a plant ☐ 	A bird ☐ 	A tree with flowers ☐ 	A bee ☐ 
A bee ☐ 	A fly ☐ 	A plant with yellow flowers ☐ 	A bug on a tree ☐ 	A snail ☐ 
A plant with red flowers ☐ 	A grasshopper ☐ 	A bee ☐ 	A lizard ☐ 	A bug on a person ☐ 
A bug on the ground ☐ 	A bee ☐ 	A spider ☐ 	A cactus ☐ 	A plant with blue flowers ☐ 
An ant ☐ 	A plant with pink flowers ☐ 	A bug on a fence ☐ 	A bee ☐ 	Animal tracks on the ground ☐
